Viewing Feedback

If your instructor has left feedback for you based on a submission to the dropbox, there are two places that the feedback can live. The first is attached to the whole submission and the second location is within Turnitin – which provides faculty with a tool that can provide more specific feedback, similar to Word’s track changes feature.

To view your feedback, go into the course, choose Assessments, then Dropbox.

If you click on View in the Feedback column, you will go to the Avenue feedback for the whole submission.

If your instructor has used Turnitin and allowed you to see the Originality Report, this colour and percentage will be an indicator of how much of the paper matches other sources. Be aware that this percentage may be artificially inflated as Turnitin does not distinguish between properly cited and improperly cited materials.

To see the Originality Report and detailed feedback on your paper, click the colour. This will take you to Turnitin. You will have to agree to the terms of service, click “I Agree” to continue.
Click the GradeMark button in the top left hand corner of the screen.

You will see blue bubbles located on the screen, these are items that your instructor has indicated are important. If you hold your mouse pointer over them, you will see more information about the issue.
